EDUCATION & CERTIFICATION

Bachelor of Science, Computer Science, Minor in Mathematics

Dec 2022

Texas Tech University, Lubbock, TX

Current GPA **3.7**

Relevant courses: System Programming, Computer Networks, Computer Architecture, Database System, Computer Security, Cryptography Engineering, Automat, Software Engineering I-II, Data Structure, Linear Eq. Intro Machine Learning, Operating System.

Associate of Science, Computer Science

Sep 2017 - 2019

Edmonds Community College

GPA **3.7** - Member of Phi Theta Kappa Honor Society

Relevant courses: Introduction to Java, Intermediate Java Programming, Java Data Structure

SKILLS

- Programming Language: **C#, C, Java, Python, XML, MATLAB, ASM, MySQL, SQL, JavaScript HTML, CSS, Visual Basic.**
- Framework: **React.JS, Angular, node.JS, ASP.net, Blazor** -Testing: **JUnit, Unit testin** - Others: **Mongo DB, Flutter, Android, Xcode, Firebase, Git.**
- Natural Language: **Portuguese, Chinese, English, Spanish.**

EXPERIENCE

Field Technician, Edmonds School district

Feb 2020 - Aug 2021

Technologies: Microsoft Tools, Windows10, Chromebook

- Provide technical support for staff and students over the phone and in person for Chromebook, Windows 10 PCs, Projectors, Document Cameras.
- Installed, configured and set up PCs in stores for optimal operation, track inventory and train newly hired field technician. Collaborate work with supervisors and peers on projects.

Events Planning Coordinator, Office Assistant, Edmonds Community College

Feb. 2019 - Dec. 2019

Technologies: Microsoft excel, Chromebook

- Plan events according to written and verbal communication from management which included; venue selection, managing budget, campus communication to all clubs, managed volunteers, and arranged all food and supplies.
- Help students as well as visitors to navigate campus to locate meeting and class locations.
- Utilized skills in multiple languages to assist as needed with students and visitors.

PROJECTS

MyTechMap, Web app of Texas Tech campus map

June 2022 - Oct 2022

Technologies: React.js, HTML, Google API, XML, MONGO DB

- Web application for students at tech to navigate through campus, the UI consist of a Login system, Favorite locations pin filter, and a search bar. **Front-end** I used React.js. Google Maps API for displaying a map, and retrieve data from Google Maps regarding locations. **Back-end** I used Express + Node.js to generate dynamic page content, create, open, read files on the server, and add, delete and modify data in the Mongo database.

Resort database mssql & Inventory database control, MSSQL Database

Feb. 2022

Technologies: MySQL, C#, ASP.Net, MSSQL server

- Developed as a team, a web-based database program for warehouses to access and store item data and employee information using MySQL. Implemented the UI and backend by using ASP.Net and hosted the website by using Azure's web server. Implemented a stored procedure to save what is added from to the database.

Music Application, Android APP

2020

Technologies: Android Studio, Java, XML, MySQL

- A music store where it allows the user to fetch all the music from a phone storage, and display with functions such as: play, pause and stop. This project was intended run in the background along with other app, which allowed me to gain enough knowledge on data manipulation.
- **Frontend** I used XML for UI, and java for the functions. **Back-end** I used Java and SQL for the database storage within the app that interacted with a recyclerView class in the Frontend.

Overview

I am a multilingual software engineer enthusiastic about life and learning, wanting to make a difference with a company that values growth, Innovation, diversity, excellence and leadership. I am a curious, intelligent, collaborative person who is passionate about technology and driven to get things done. Not afraid to bring my authentic self to work. I embrace a continuous learner mentality with a desire to grow myself as well as others.
